Work Experience

TECHNOMASR FOR SOFTWARE SOLUTIONS (MAY,W 29 2024 - CURRENTLY)

- Worked independently within a team of peers, taking initiative in decision-making and problem-solving. Collaborated with SEO, UI/UX, and backend teams to integrate design and functionality, increasing performance by 40% and achieving high ratings in SEO, best practices, and accessibility.

RAYAGATE (NOV 1 - DEC 20, 2023) PAID INTERNSHIP

- During my internship, I learned about Agile and Scrum methods, including planning and reviewing work in short cycles. I worked closely with UI/UX designers and backend developers to make sure design and functionality worked well together.

Skils

- **HTML5**: Page structure, SEO-friendly
- **CSS3** (Sass, Bootstrap, Tailwind CSS): Responsive styling, mobile optimization
- **JavaScript** (**ES6**, **REST API**, **jQuery.js**): Interactive functionality, data fetching
- **TypeScript**: Strong typing, error prevention
- **React.js** and **Next.js**: Single-page applications, fast rendering
- **Redux**, **Redux Toolkit**, **RTK Query**: State management, data handling
- **Chart.js**: Interactive data charts
- **React Helmet**: Boosts search visibility SEO
- **React Toastify**: Real-time user notifications
- **GitHub**: Version control, team collaboration

Familiar With

- **Node.js (Express.js)**: Backend framework for building web applications.
- **MongoDB (Mongoose)**: Database for storing and managing data.

Language

- English (B1)
- Arabic (Native)
